The Department of Emergency Medicine at the Icahn School of Medicine at Mount Sinai is a national leader in delivering outstanding patient care, conducting ground-breaking research and providing excellent training experiences. Through a unique partnership between the Icahn School of Medicine at Mount Sinai and the six member hospitals of the Mount Sinai Health System – The Mount Sinai Hospital, Mount Sinai Beth Israel, Mount Sinai West, Mount Sinai St. Luke’s, Mount Sinai Queens and Mount Sinai Brooklyn – our Department of Emergency Medicine serves one of the largest and most diverse patient populations in the nation.

Emergency room patient visits reached nearly 500,000 throughout the Health System in 2015. The full-service Emergency Medicine Department encompasses a wide range of specialties, including but not limited to stroke, cardiac care, orthopedics, obstetrics, asthma, psychiatry, and services for victims of violent crimes and torture. Split-flow operations and care transition management ensure continuity and a patient-first focus across the Health System. Approximately 200 physicians serve on the Emergency Medicine faculty.

Educational programs include three highly competitive ACGME accredited residency programs with training occurring at four Health System campuses. The largest, at The Mount Sinai Hospital, is ranked first in New York by Doximity. Seven clinical fellowship programs offer advanced training in Ultrasound, Global Health, Medical Informatics, Pediatric Emergency Medicine and Simulation. Opportunities for research-focused experiences foster career development and leadership training. The Emergency Medicine medical student clerkship is required of all students, and has recently received the highest ranking of all clerkships at Mount Sinai.

Research is an important component of the Emergency Medicine Department, which is ranked second nationwide in NIH funding in the specialty. The Department has received inaugural funding of a T32 for Emergency Care Research, and the recent receipt of a prestigious CMS Healthcare Innovation Award underscores Mount Sinai’s national leadership in Geriatric Emergency Care.

In filling the position of System Chair of Emergency Medicine, we seek a highly experienced clinician educator, with a commitment to superlative patient care, teaching, and scholarship. The ideal candidate is a distinguished national leader in the specialty, with a proven track record in clinical operations, clinical care and education, and a strong appreciation of or experience in research. Excellent communication skills, a collaborative approach, and evidence of managerial success are essential.
Applicants must hold an MD degree, must be board-certified in emergency medicine, and must hold or obtain a New York State medical license.

Mount Sinai offers a competitive salary and an excellent benefits package. All interested applicants are invited to send their curriculum vitae and letter of interest to David L. Reich, MD, Search Committee Chair at david.reich@mountsinai.org.

Mount Sinai Health System is an equal opportunity/affirmative action employer. We recognize the power and importance of a diverse employee population and strongly encourage applicants with various experiences and backgrounds.
