

Radiation Oncology faculty Assistant Professor Rank

The Department of Radiation Oncology at Weill Cornell Medicine is seeking experienced MD/PhD candidates for appointment at the Assistant Professor rank, with post-doctoral training and a record of accomplishment in the areas of tumor immunology, DNA damage response, radiation-induced checkpoints and cell cycle control, genomics and DNA repair.

Successful candidates will have demonstrated distinction in research, clinical care, and graduate medical education appropriate to the programmatic needs upon which the faculty appointment is based. Salary is commensurate with qualifications and professional experience.

The Department of Radiation Oncology offers clinical programs of excellence in Breast, CNS, Aero digestives, and GU cancers. We also offer a comprehensive range of clinical services for all other neoplasms. Our state-of-the-art technology platforms include Aria information system, Eclipse treatment planning, IMRT, IGRT, 3D-CRT, stereotactic radiosurgery, and brachytherapy. Planned technology acquisitions include Gamma Knife, and MR-guided linac. In 2017, the Departmental research faculty will be moving into newly renovated research labs, and the clinical faculty will be launching outpatient radiation oncology services in a new, state-of-the art ambulatory care facility.

Applicants should submit a curriculum vitae, cover letter, statement of research/teaching, and contact information for three references to the office of:

Silvia Formenti, MD
Sandra and Edward Meyer Professor of Cancer Research
Chair, Department of Radiation Oncology
Associate Director, Meyer Cancer Center, Weill Cornell Medicine
Radiation Oncologist-in Chief, New York Presbyterian Hospital
